

## **ACCESSORIES FOR PLAYSTATION®3 BECOME AVAILABLE** *Wireless Controller (SIXAXIS™), Memory Card Adaptor and BD Remote Control*

---

**Tokyo, October 3, 2006** – Sony Computer Entertainment Inc. (SCEI) today announced that Wireless Controller (SIXAXIS™) and Memory Card Adaptor would become available simultaneously with the launch of PLAYSTATION®3 (PS3) computer entertainment system on November 11<sup>th</sup>, 2006, in Japan, at a recommended retail price of 5,000 yen (tax included) and 1,500 yen (tax included) respectively. BD Remote Control will also become available on December 7<sup>th</sup> 2006, at a recommended retail price of 3,600 yen (tax included).

Wireless Controller (SIXAXIS) for PS3 employs a high-precision, highly sensitive six-axis sensing system, which detects natural and intuitive movements of hands for real-time interactive play. With the adoption of Bluetooth® wireless technology, it allows up to 7 players to play at the same time, without having to attach any other external device such as a multitap. In addition, by simply plugging a USB cable to the controller, users can seamlessly switch from wireless to wired connection and automatically charge its battery while the controller is in use. Controller battery lasts up to 30 hours when fully charged \*1).

The new Memory Card Adaptor enables users to transfer data saved on Memory Cards for PlayStation® and PlayStation®2 onto the hard disk drive of PS3. To transfer data, users need to simply insert their Memory Cards to the Memory Card Adaptor connected to PS3 via a USB port.

In December, BD Remote Control will also become available, which enables users to easily operate movies and music content on BD (Blu-ray Disc) and DVD on PS3.
